

Rhenium Melting Stock

Utilized by major aircraft engine manufacturers worldwide, rhenium-melting stock is one of the alloying additions in super-alloys for turbine blades in jet engines. Rhenium pellets are excellent for use in chemical vapor deposition reactors.

Rhenium Alloys provides two purity grades of melting stock, 99.9% and 99.99% pure on a metals basis. The following are available:

- 1/2" Diameter Pellets
- 3/8" Diameter Pellets
- Pressed and Sintered Bars
- Pressed and Sintered Coarse Chunks

Our careful fabrication process provides you with minimal loss of product through dusting or crumbling.
